Product Catalogue

PS Thermo

Smart thermostat with touch-screen control panel for universal control over:

- Heating / cooling systems
- Hot water systems

PS Thermo allows the user to monitor and control easily his/her home climate. The device has connection to a secure server, which allows the users to use the ProSmart App for better control when they are not in home. The PS Thermo's control panel is also designed to work in offline mode, when Wi-Fi signal is not available. For this purpose, 433MHz radio communication is used between the relay and the control panel, which also has a built-in clock to follow the pre-set schedules.

PS Thermo set includes:

- Touch-screen control panel
- A relay module
- Power adapter
- Montage kit
- User manual

BBoil Classic

Wired smart thermostat for universal control over:

- Electric, gas and solar water heaters
- Irrigation systems

BBoil Classic is a great and universal solution for water heating systems. It has a wired temperature sensor and ability to connect to Wi-fi, which allows the users to monitor and control the hot water availability using the ProSmart App from anywhere. That way the energy consumption is optimized.

BBoil Classic set includes:

- A relay module
- Wired temperature sensor
- Montage kit
- User manual

BBoil RF

Wireless smart thermostat for universal control over:

- Electric heaters
- Pellet and gas boilers and stoves
- Pellet, gas and oil burners
- Solar thermal systems

BBoil RF is a device that has wireless temperature and humidity sensor, great for monitoring and control of the home climate. It is easy to manage the heating / cooling systems from the ProSmart App (available free for any OS).

BBoil RF set includes:

- A relay module
- Wireless T&H sensor
- Montage kit
- User manual

PS Gate

Wi-Fi controllable relay module for universal control over:

- Entry and garage doors and gates
- Barriers and bollards
- Roller shutters and blinds
- Roof windows

PS Gate is a device that works with almost every type of impulse automated system. It is a reliable way for controlling the access to home/ garage, giving real-time information of the door/barrier's status and detailed history for who opened/ closed it. All these features are guaranteed by the ProSmart App (available for all OS free)

With **PS Gate set** you receive:

- A relay module
- Magnet sensor
- Montage kit
- User Manual

ATTENTION:

PS Gate is working on Voltage: 8 – 36V AC/DC

PS Plug

Wi-Fi controlled plug suitable for the control of any home appliance (up to 10A or 2kW) through a smartphone.

PS Plug allows the user to switch off any home appliance from distance which makes it great either for irons and fans, but also for presence simulation when the user is out of home, but wants to simulate he/she is there for security reasons.
